

# Item Registry

*Filename:* registry

You work for a debt collection agency. In order to keep track of who they need to find, the company wants to keep a list of names and the amount they owe.

## The Problem:

When given a name, you need to output the amount they owe. The names/debts are:

Emanuel	123
Colt	526
Gavin	2784
Layla	235
Kianna	98765
Jaydan	236
Shaniya	7934
Amanda	427
Joseph	247
Jazlyn	2945
Luke	23880
Blaine	5

## The Input:

The name of a debtor.

## The Output:

The amount the debtor owes.

## Sample Inputs:

Emanuel

Luke

Jaydan

## Sample Outputs:

123

23880

236
